"So what's your solution?"

Never claimed to have one, its not my job nor my profession to repair broken sewage pipes. But someone gets paid to do it, and they arent doing their job and they need to be held accountable. Isnt this the second or third time its happened in the same spot?

Also, couldnt it just be turned off/diverted further up the line someplace and let it drain from the same spot til the pipe is empty? Again, i have no knowledge, just axing
