Here is a list of richest countries in the world from Forbes based on GDP. US is ranked 7th.

<http://www.forbes.com/pictures/egim45egde/1-qatar/>

One problem, it's based on per capita income. Nearly all those countries are small in population and size. The USA has the largest population of ANY country on the list. By total wealth we are the richest country on the list without a doubt. Come on how many people live in Norway, Switzerland, Austria etc.. I would bet our population is larger than all those countries populations put together! NO WAY are any of them REALLY richer than the USA.
