I have done a lot of research on the area but have not fished yet.

As tomitrout says, check in with Murrays fly shop. There is a book that they sell by Mr Murray himself that tells you exactly where to fish were to park etc. It also gives good stream info.

Most of the streams talked about in the book are accessed from skyline drive.

You can go to murrays flyshop online and order the book and read it before you go to help plan your trip.

And you really should stop in the fly shop before you fish. I met the owner and he will tell you anything you want to know.

fly shop: <http://www.murraysflyshop.com/>

book: [http://catalog.murraysflyshop.com/pro ... -shenandoah-national-park](http://catalog.murraysflyshop.com/pro...-shenandoah-national-park)

There are some threads on the forum about fishing this area also.

There are Maps you should have also. You dont need the appilachian trail maps although they are real good, theres another good map to get which is a must have. I have it at home and will post later.
