The park map by Trails Illustrated is very good and that's what we used to fish down there. Mandatory gear, IMHO.

Yes this is the map I was talking about in my previous response.

Harry Murray's fly shop carries these maps.

It's good to order maps before the trip, to make plans. But, also make time to stop into the shop on your way down. Have you ever seen a combination pharmacy and fly shop before? It's pretty cool.
