interesting to recall some of those storms. I got my house in the month with the day of heaviest rain for 15 years, in an area with springs. nice :)

the article gives vivid examples of heavy rains in our region last 15 years. it also says that days with 2+ inches of rain are more common in DE since 99 without showing any older data as the "before" picture. I noticed that on first read and titled my OP "on the rise?"

it's a newspaper folks, and reporters aren't specialists and cant work for too long on each article. it would be careless to select and present the post 99 data if the pre 99 data look no different. I tend to doubt they did that, but it's a newspaper folks.. ...
