Clarifying comment: It is hard to find better scenery, hiking, and wildlife in the continental USA than you will find in GNP. If you don't get to fish there, or if the fishing is not great, you will still have a superior experience if you are fit enough and take advantage of the trails that take you more than 3 miles from the roads. The short trails tend to get crowded with tourists, but if you hit the trails before 8:30 AM most of the tourists are still at the campgrounds, lodges, etc. Hit the steeper terrain and you can really weed them out.
