Glacier really is an amazing place. I saw my first grizzly there and also caught my first cutthroat. I don't have any experience with a guide in Glacier, but I found this site to be very helpful in planning my trip.

If you are just looking to fish the smaller backcountry lakes, the fishing is pretty easy. All I really needed was a royal wulff. I wasn't able to fish any of the rivers in the area though; they were still roaring from run off when I was there.
