I've done many vacations to the Bethany/Fenwick area. Never flyfished, but have fished the surf and back bays with bait many times.

Late June/early July is probably still a little early for Croaker and Spot, but you may have a few there. They're small, but fun and easy to catch in large quantities, if they're around. You're probably in between the time periods in Spring and Fall when you could expect Stripers or Blues, but there should be some Fluke and small Black Sea Bass around. There's always seems to be plenty of small Sand Sharks from the surf at dusk.

I just throw a split rig with two different size hooks...small one for squid strips/frozen shiners, and a larger one with whole finger Mullet or fresh cut Mullet or Spot. Attach a 3 or 4 oz pyramid sinker for the surf, or a 1 or 2 oz sinker for the bays and chuck it out there.
