I would like some clarification on the DHALO. I was fly fishing the East branch clarion river DHALO this past weekend and was wondering exactly what baits are allowed and not allowed. Specifically if your allowed to fish with egg patterns made of yarn or foam and also i want to bring my little brother out there but hes to young to fly fish and he fishes with a worm and was wondering if you could fish with a worm on this part or no.

I was told by some people that fish there that you can not use a worm and some people said yes and others said no on the egg patterns made of some synthetic material (I don't normally use the egg pattern except for the first few weeks of opening season) and was just looking for some clarification.
