I have a list of brook trout streams that I want to fish in Maryland. The streams go through dozens of properties as they are in populated areas. The stream are not posted at any point that I would fish. From what I have heard, correct me If I'm wrong, it is alright to fish these areas as long as you stay in the stream bed. Does anyone have any insight in to the rules to this. I don't want to break any laws just to fish
