What's the best way to add weight to a reel - weighted trolling line as backing???

That's one way.

If you're talking about a Medalist, there's a little tab on the arbor that you can pry up, add shot, and bend back down.

Or you can wrap the foot with lead wire. (By "foot" I mean the "ankle" if the foot were really a foot.) I used to do that with the little stamped metal Martins back in my less prosperous days.
