I've been searching the web daily/weekly for Little Lehigh fly fishing reports but have come up empty handed every time. I fish the stream on the heritage section everyday the weather conditions allow me to any where from 4-8 hours. I wanted to start posting daily reports for anyone whose looking for quick tips, tactics, and general updates of the stream life and fishing before they head out to wet a line on the LL. Starting today May 5th, I will be providing daily reports coming straight from the Little Lehigh's Heritage Section. If anyone has any questions or thoughts for me along the way I'd be more than willing to help or listen.

Thanks, Mike Deutsch
