No olives (well, no major hatch, I think there's a few 365 days/year, but this is a down period). No cahills.

Sulfurs have started and will be ramping up. March Browns should be prime. That's the blockbusters. No major caddis but there's always a few and they can be effective. Could be some remnant Hendricksons.

For evenings, rusty spinners in sizes 10-18 should cover you!
