another book that i`m reading right now is ...slack line strategies for fly fishing...by john judy, different ways to cast using slack in your presentation, especially downstream casting, i`m about halfway finished great book

I've been reading this book as well. I've always felt that some of the standard presentations being recommended in most literature had some issues producing drag at times but this is the first time I've seen it put to print.

The other day I fished the LL and watched a fellow on the far side execute a slack line downstream drift to catch three consecutive trout. Very useful tool especially in an area where you can't wade into a down stream position.
