Fished the top end of the C&R area down to the area with all the downed trees. Started with a mosquito dry fly with a rs2 dropper. Had one strike on the mosquito. Then switched to a black wooly bugger. Had two strikes with no takes and rolled several other fish. Then switched to a stonefly nymph with a size 16 fb Pheasant Tail dropper. Caught 7 in about 20 min and had several other strikes. 4 were on the stonefly nymph and the other three on the pt. Talked to one other guy before leaving. He said he caught a couple on a tan caddis. Got sick of being bitten up by mosquitos and had to leave. Had a pretty good time besides the bugs. Water is still cool and saw a few caddis but ALOT of mosquitos
