I had a pair of 50 dollar proline waders for over 10 years. I'm on my second set of cabelas in 5 years. My first pair of cabelas were neoprene. My new ones are Breathables and I like them a lot. Are you leaking at the seam? I found out that my neo cabelas were leaking because the seam in the heel of my boots were wearing a hole in them. With all that said, I don't see alot of better deals than Cabelas but I'll probably get what I paid for eventually. Never know...I miss that pair of proline waders.
