I have herd that if i go long enough on the 4wt it should balance better. How long is too long for a small trout stream? The GX also comes in a 3,4,5 but that wont be beefy enough for the 6wt then when I hook a monster smallmouth 🍷 Im not sure how big of an roll the reel itself plays in casting.

And to answer your question about the screen name..That's my baby, 2011 silverado that I put up 9" on 36's 😊
