Dear Leo,

You didn't mention where your waders are leaking? If they are just getting wet in the foot you could probably get some more time out of them with a pair of Gore-Tex or Seal-Dri socks.

One thing I will add is that many people complain of wet feet because the neoprene feet in their waders fail. Make sure you always wear gravel guards and make sure your wading shoes fit properly. You can get a lot of accidental wear in the feet of your waders if you don't.

Regards,

Tim Murphy
