As has already been stated, these rods couldn't possibly be more different. The LS is essentially going to be a dry fly only rod. I'd recommend the [G Loomis NRX LP](#), [Winston B3x](#) or [Orvis Helios 2 Tip-Flex](#). They are all solid at dries, but still have a little power leftover for the odd streamer.

Or if you want a little more confusion, check out our [5-weight shootout](#).
