My first and favorite:

<http://www.amazon.com/Orvis-Fly-Tying-Guide/dp/1592281214>

It will walk you through something like a half dozen basic patterns, such as a hare's ear, bugger, adams, and a few other basics. From there, you apply the skills taught in them to tie any of the hundreds of patterns listed in the final section. I think they have the recipes for the entire orvis fly catalog from the year it was published.
