Previously I've recommended the twist on floats as some of the best I've used, also a close second are the floats that Cabelas offers. Well I tried a Thingamabobber over the weekend that I was given to try and I've got to say I'm hooked. They cast great, turn over easily and make mending your line much easier too. Like Tom mentioned, they go on very easily.

I'm converted, Thingamabobber is now my go to float, I've just got to get past the name! HA!
