I'm up for the swap. I'm thinking I might lean towards a dry fly as anymore all I've been tying is subsurface and I'd like to get back to some top water. Are we focusing on trout solely or can it be something for warm water?

I can also take the pictures if needed. I just got a sweet Olympus Stylus 1050 that has awesome macro settings. I can't wait to take some bug pics on the stream this spring.
