Bruno,

I'm still not sure of the legality in the heritage section, but they will KILL in the little lehigh. I saw a guy using them catch a fish damn near every cast in the kiddie pool at the hatchery outflow.

I'm thinking of collecting some pea gravel from one of the centre county streams to make a cased caddis. Not necessarily a household item, but it's definitely original, and who doesn't want a piece of a world class trout stream in their box? We'll see if I remember.

Otherwise, it might have to be the dryer lint adams.
