hey. Just wanted to get your opinions about "tell-all" books written by Dwight Landis, Charles Meck and others. Are they helpful or hurtful? In other words, do you feel these books give away too much info about overlooked/underfished spots that otherwise garner little or almost zero attention? Places that perhaps would suffer if too much "love" is payed to them because of such books(or now a days, website forums). I generally don't post stream names for this very reason. I've always had my concerns just wondering if I'm alone in thinking this way.

FYI: this is a poll about specific books and not the authors themselves. I respect (most of) them for what they've contributed to trout fishing over the years. No one can deny Mr. Meck & Mr Landis have been good for the sport and wild trout in Pa. However, I do take exception to certain aspects of their works(i.e. "spot burning).

Thanks,  
Mark
