As a new entrant to the state and the sport I've read my share of these books for PA. Not knowing any flyfishermen made it tough to get into the sport and not knowing a single thing about the area made it nearly impossible.

I voted good and bad. The books were very helpful in showing streams and good ways to get to them. However, neither of us have any interest in reading about hot spots with exact coordinates on streams. Honestly, we'd rather find them on our own.
