I think they are a good resource. I picked up Charlie Meck's "Pennsylvania trout streams and hatches" within the first month or so of me fly fishing. I had no clue what I was doing, and only fished a local park, because it was the only place I knew of locally that had trout. The book broadened my horizon to the many "popular" streams in the area. All of the one's I have fished so far were popular fishing spots (Neshannock, Slippery Rock) that I could have found by doing some research, but when you have an expert to do that for you, it opened my eyes to places to go and the hatches and stories about the streams. If it wasn't for that book, I wouldn't have gotten addicted to this sport, nor have joined this chat board and have fly fishing always on my mind!
