2pm - 6:30pm. Weather Upper 50's, showers. Streamflow 244cfs @ dam (moderate flow). Water temp. mid 60's - clear.

Hatches: Small (#20) BWO's, a few Trico spinners at 5pm, some tan caddis, and a few large light colored mayflies - Cream Cahill?

Caught 4-5 smallish rainbows (along with two trophy suckers and some rock bass). Not many rises. Caught all fish on nymphs - copper johns and BHHE. Conditions near ideal, but not a great outing for catching - but glad to be out.
