I fished the main and west branch of the Perk on Friday and Sunday, respectively. I caught (5) 7"-12" browns on the main and 7 or 8 chubs. On the west branch I managed to catch (6) 4"-10" browns. I'll try to post the picture I took of the little 4". He's pretty neat. All fish were caught with a beadhead hare's ear. The water temp was in the mid 50s and at a good level on both streams. Both stream are producing trout and all but 1 or 2 are wild.
