Fishing is fishing and carp fishing is a blast without a fly rod. I've tried to tempt them with my fly rod but never hooked up. My son has landed one and said what ever you do, don't net them. They'll stink up your net forever! I wish everyone wasn't so far apart it would be a blast to have a carp fishing day. The other thing I'd like to try is channel cat fishing with a crappy rod. Don't get me wrong I LOVE trout fishing, but I also just plain love fishing in any form even though I never use a spin rod anymore.
