I looking to buy a fly rod just for smallmouth . Can anyone give some good intel on what wt action and brand of rod would be good for fishing for smallies on the Brandywine and Perkiomen rivers. Alot famous bass fishermen like Clouser and Murray say to use a 8 wt rod when fishing for smallies . But wouldn't that be to much for these rivers the average smallie, I catch is usually about a foot long . Any information you can give would be helpfull thanks...
