Troutbert, since you are aware of the search abilities of the board, I challenge you to "dig up" any attack on "flyfishers involved in stream and fisheries conservation," that you claim I have "repeatedly" expressed. This is blatant manufacturing of history to suit your purpose and it and it alone is the reason the issue is ever discussed. It is not only you, but likely primarily you, that perpetuates a false impression of my feelings on this topic. Frankly, one wonders why the suggestion that some folks involved in stream improvements are feathering their own nest strikes such a nerve with you.
