This was my first time here and I fished the Heritage Section from 12-2:30pm. I started under the bridge and saw a bunch of fish feeding on the surface. After about an hour I finally landed a 12" brown on a midge emerger #20. Later I caught two 6-8" Shad on a Copper John nymph #18.

The water was clear and COLD. Weather was sunny and beautiful at 65-70 degrees. Saw plenty of fish and had three others that bitt but I didn't land.
