I stepped on a wasp nest and got covered with them. I had a hooded sweatshirt on with the hood up on a cool June morning. It was zipped up, luckily I grabbed the waistline and pulled it over my head turning it inside out. I ended up getting stung once in the hand. They were coming out of the sweatshirt for over an hour before I could pick it up again. I think the thing that saved me was they were a bit lethargic in the cool air. I was on Penns half way between Poe Paddy and Ingleby. This was back before cell phones so it would have been dicey trying to get back to the car if I got stung 20 or 30 times.
