Last time I got stung by a bee it hurt 3 times harder than when I got stung as a kid. I chalked it up to super bee evolution over 40 years between my bee stings.

I also fell on the ice a while back. Ice also evolved into super ice since I don't remember ice being that hard and slippery when I was a kid.

I carry a first aid kit in my boat. I also take it surf fishing since beach vehicle passes require it. I Don't know exactly what's in since I've never opened it. Don't carry anything when wading but it's a good idea. A couple band aids won't take up much room.
