BFC is hardly a representative case of wild brook trout streams. It is far different than your run of the mill brookie stream, and faces different pressures.>>

Unless I suffered a fugue and missed some posts (an increasing possibility), I think the Fishing Creek under discussion here is one of the branches of the big freestone version in Sullivan and Columbia counties and not BFC, as in Big Fishing Creek in Clinton County.

No, you didn't miss anything. I was indeed referring to the West Branch of Fishing Creek in Sullivan Co SGL 13 earlier. The one that used to have "Class A Wild Trout Stream" status. For whatever that's worth. 🏠
