Dear Steve,

Flyfishermannj posted the recipe and a good picture. I want to state something that should be obvious and that is that most yarns you buy in a bulk skein are 3-ply. Seperate the plies before tying sucker spawn because you only need a single ply to tie the fly.

If you look at a sucker spawn fly from the eye of the hook sighting down to the bend it is nothing but a bunch of figure-8 wraps with the yarn bound down on top of the hook shank.

Regards.

Tim Murphy 😊
