Well, Wbranch. Not really a lot to it. Depends which style. Euro, Czech, French.

Euro usually consists of nothing but mono, on reel and water. Sighter, piece of hi vis, to detect strikes. tippet ring. then fluorocarbon.

check out lance eagen. youtube set up.

2. Czech usually 7 1/2 to 9ft. high vis butt and generally 2 drops. fish 3 flies Close and deep is the key. Flies generally are different colored caddis larve, pupa. weighted. beadhead and weight.

3. French.--can be same as above or general usage single nymph.

coils are used as the indicator. to make coil. 1st take about 2 feet hi vis line, put a perfection loop on each end. get a nice big long bolt and wrap hi vis line around bolt, not to overlap. secure both ends with ty straps to keep line unwinding.

boil for 5 minutes. take out a put in freezer. when unwrapped the line memory will be coiled and stay coiled.

when the coil stretches a little. fish on.

these methods have been blown out of proportion recently. everyone has a bigger, better, method. improved.

how do you improve something that is already good. tippet rings. baloney. you fell for it. tippet rings. known as jump rings to the jewelry makers. get them from a jewelry catalog. fire mt. gems. 1/5 of what the fly outfits charge.

last most important. keep flies close and deep. rod length depends on, you guessed it and fell for it. not what the others say. what is comfortable for you.

ps you already know how to do it, you just never did do it.
