Are the blanks made in the US and shipped overseas for assembly?. How many blank makers are there in the US? Just me, my salt water stuff is mostly custom made locally. Those are on Fenwick, old Shakespeare and others that I can't recall. I've got some Penn, Star, and Shimano rods and reels. I'm not an elitist regarding tackle and I know that the fish aren't either. Buy locally and help the shop owners. I got some hellacious deals on equipment at the hock shops. Got some good blanks, old rods, and had them re wrapped. No none of my rods have my name on them.
