Yeah, 5, 3, 7, 4, 6, 2, 8. Then there's the whole long/short thing and the fast/slow thing. You could end up with 24 rods before you're comfortable you have everything covered.

I think you are only allowed to carry 14 rods in your bag at one time!

My first choice would be a 5 weight since you can punch thru the wind better and throw weighted streamers.
(Also small stream smallies and rock bass.)
