Advantages of Fast Action Fly Rods

Longer Casts - A fast action fly rod is ideal where the angler needs to make consistently long casts.

Landing Large Fish - A fast action fly rod makes it much easier, and quicker, to land very large fish.

Windy Conditions - Due to the high line speed generated by fast action fly rods, casting in windy conditions is much easier and more effective using a fast action fly rod - especially if used in conjunction with advanced casting techniques that help reduce some of the effect of wind resistance.

Quick Casts - The stiffness of fast action fly rods allow for very quick casts - something that is often appreciated by advanced anglers since more casts allow for more potential fish to be caught.

just because we agree doesn't mean we are right-lol

Afish-wins this one

Since I am into spinning now they say mh for distance-not same as fast-
