oh i see what your talking about now. Dont think that the other stream that was mentioned in that other post doesnt get pressure. Going by this thread it added about 6 fisherman to the water. If we were to take those averages then, we will say that other post added about 10 fisherman. I made it higher to show you what i mean. I can tell you from experience that the stream is tough at times and probably over half those 10 fisherman struck out. I know that stream and its fish can handle being caught by 5 skilled fisherman.

Keep in mind my numbers are less than facts. Just showing you i dont think it matters. That other post never mentioned catching fish like this one did either. Dont think im disagreeing with your concerns. Name dropping can be dangerous but it can be over played also.
