Ya i hear ya but the big fish are about 10 years old or more and are accustomed to eating them. Ive used pellet
flys with some success. But when nothing is hatching, which is often on Lititz Run, but that is slowly changing
thank god, they dont want anything else. I wish they would stop feeding the fish and let nature run its course.
Ask squaretail about the trip we took. He will tell ya those damn fish just want fake food 😊
