I would have to say tully, it's a good trout stream don't get me wrong. I just haven't seen or caught many big trout in it. To me a big trout is 20", I'd rather fish a stream that I know has potential for a monster, or many monsters for that matter. Like Spring, L.L and a few others, I'm talking streams not rivers. I'd rather catch one big trout than 10 small ones IMO.
