Has anyone used the Cortland 555 Rocket taper line? I bought a new reel this year and was talked into trying this line. I initially liked it and could cast it a mile. However, a few weeks ago I noticed it was starting to break down in a section about 10'-15'. I thought I had something on my line but when I looked closer and bent the line, I noticed the whole section was a series of cracks. I've only used it this year and it seems to me like a defective line but I wanted to see if anyone else has tried this line or experienced the same problem.

Thanks.
