I can back what Padraic said about Wulff TT. I've been using it for a long time. I use it on all my trout rods. I lasts as long or longer than other lines I have tried. It floats well for me, as long as you keep it clean. It works for short as well as long casts 60'+ (except in the Delaware - it always casts two feet short of a rising fish). I like it most of all because you can roll cast it a mile. Just my opinion.
