I don't own a pair of Neo's because a lot of my winter fishing is on small local native-brookie streams that I can fish from land and jump across. However, when I do use my breathables, I wear jeans with poly-propylene thermal pants underneath.

My next pair of waders will be Dan Bailey's: they are lifetime warranty, fold down to become waist waders, and are more tailored than cheaper waders. Plus, they start at around \$100, and the boots are about \$50.
