I had the same problem yesterday with hooking fish, I was using a size 22 or 24 fly . One of the problems I was having was I was hooking them but they would be on for about 2 seconds and then they would come off.The other problem was that I was trying to set the hook and wouldn't end up hooking anything . So I decided to let the fish take it longer and ended up getting the next 2 after missing 5 .But I'm going to try your trick next time MKern and let you know if it works for me. I was happy though I caught my first trout on a dry fly 🎣 😊
