I have 555 on my 8wt and do not like the stuff. It is the worse line that I have ever owned. The problem that I have with mine is that it gets into huge birdnest when I strip my line in. After having it for 1 year I returned it to the store where I purchased it and they exchanged it on the spot for the same line. The newer line has the same problem. Someday I'll replace it with 444.
