I do feel that the recreation benefits of such an impoundment will not get adequate representation on this site. I didn't really expect it to.

I do think that the majority probably prefers to have the lake. If the funding for the park were to be available, this would have to be considered.

Am I for more cold water fisheries? Yes. I don't think it's in our (FFermen) best interest to move forward with a blind eye to the needs/wants of the populous. Many trout fishermen are guilty of just that.

Ask any bass fisherman what he thinks. It's arguably the most popular brand of fishing, so his opinion should be taken under consideration.
