Free? ya think? Ask Mo how much \$\$\$ has been spent to protect, improve or restore habitat for these free fish. How much \$\$\$ has been spent by on lawyers and lobbyists to keep these wild trout free of pollution and development. Or by free do you mean that they need NO help from us what so ever since its not like they are fragile or anything....

That was Money spent for the watershed not the fish. The fish are still free. Also There are MANY more streams that have been protected by state gamelands. That money was not spent to protect wild trout, it was spent to have hunting land. Also many streams were restored to stock also. At least 6 in Lancaster County alone.....so going by your thinking....we restored streams to stock even upping the price of stocked fish. Heck just look at the Tully in Berks.

Id be willing to bet wild trout are a heck of a lot cheaper than stocked fish Tom.

Nice try!
